**Q: What is connection?**

**A: Connection -- at the deepest level -- is the knowing that we are not alone. It is the understanding that we are a part of something outside of ourselves.**

**The hunger for conscious connection is the yearning to activate that knowing -- in other words, to move into action around that connection. When we act from a place of honoring connection, we form community. And ritual is the means used to re-member or re-connect to that place of honoring the knowing.**
